Wired Connection via USB plug

1. Plug it into the computer USB port
2. Turn on the power " M/🔌 " , the LED light flashes and hear the prompt sound "power on".
3. The computer will automatically recognize and set the audio device (USB2.0 Device) as your computer playback device. Then, the PC speaker is ready to work for you.

Note: When first booted, the USB computer speaker defaults to the sound card audio output.

Switch RGB light mode (Turn off the light)

Short press the M/🔌 in any mode. You can switch from RGB Breath Flash- RGB Slow Flash- RGB Fast Flash-Light Off

Wireless Connection via BT

When the computer speaker works as an output device for the computer or laptop;

1. Turn on the computer speaker and the prompt sound "power on".
2. Quick double-click the $M/\text{Ⓟ}$, and you will hear "du du du", it means BT Mode
3. Turn on the BT of your device, search for "**A8**" and connect it, you will hear a prompt sound "Connected".

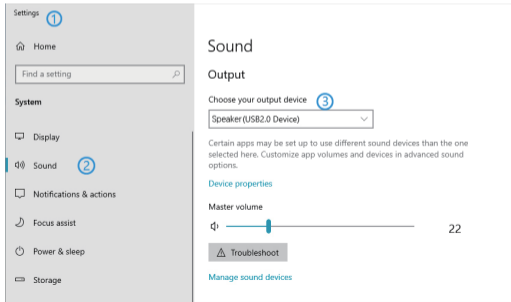

(If directly plugging in the USB charger or power bank, only BT Mode, you could directly search for "**A8**" and connect it.)

Troubleshooting of Sound

If there is no sound response after plugging it into the computer USB port, please make sure:

1. The USB interface of your computer can work normally or not?
2. The audio driver of your computer sound is up to date or not?
3. Click the "Speaker" icon in the taskbar, and make sure that "Speaker (USB2.0 Device)" is selected as your computer playback device.

The screenshot shows the Windows Settings application. On the left, the 'Settings' menu is open, with 'Sound' selected and marked with a blue circle '2'. The main content area is titled 'Sound' and 'Output'. Under 'Output', there is a section 'Choose your output device' with a dropdown menu showing 'Speaker (USB2.0 Device)' and a blue circle '3' next to it. Below this, there is a note: 'Certain apps may be set up to use different sound devices than the one selected here. Customize app volumes and devices in advanced sound options.' There is a link for 'Device properties'. A 'Master volume' slider is shown with a blue bar and the number '22'. At the bottom, there is a 'Troubleshoot' button and a link for 'Manage sound devices'.

Troubleshooting of BT Connection

1. Make sure the BT of the speaker is not connected by other devices.
2. Unplug the USB from your device.
3. Delete "A8" memorized on your device, then search for "A8" and connect again.

If it still doesn't work after the above inspection, please contact us for more details and further instructions via message or **bobtot-us@bobtot.net**

Precautions for safe use:

1. Please use this machine in a cool, dry, and clean place.
2. Do not place near the exposed flame sources. Do not expose to water droplets or splashes.
3. Do not use metal, wire or other objects to insert from the opening of the machine.
4. When using a power adapter to supply power, please use the voltage and current that are consistent with the machine's charging port.
5. Please do not energize the machine for a long time. Please unplug the power plug from the power socket when going out or during thunderstorms.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off

and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
